

CRYO ICE MACHINE BY AIRCAST

SKU: DJO-51A

Product Overview

The Aircast Cryo/Cuff™ IC Cooler delivers integrated cold therapy with intermittent compression to help reduce post-operative swelling and support improved range of motion. Featuring a built-in pneumatic pump within the lid, the system offers both gravity-fed and motorized compression options for controlled, consistent therapy. Designed for quiet operation and portability, it is suitable for home recovery, clinical environments, and athletic training settings.

Features

- Combines cold therapy with intermittent compression
- Helps reduce post-surgical swelling and inflammation
- Integrated pneumatic pump built directly into the cooler lid
- Gravity-fed and motorized compression options
- Whisper-quiet motor for comfortable operation
- Insulated, durable cooler maintains cold temperatures
- Quick pad disconnect for convenient setup and removal
- Portable design for home or clinical use

Machine Options

Gravity Fed – DJO-2125

Motorized – DJO-51A

Available Cuffs & Usage

Shoulder

DJO – 12A

An anatomically shaped cold and compression cuff designed to provide targeted therapy to the shoulder joint. Ideal for post-operative recovery, rotator cuff injuries, and shoulder trauma.

Knee

DJO – 11

A contoured cold therapy cuff designed to fully cover the knee joint for consistent cooling and measured compression. Commonly used after knee surgery, ligament injuries, or sports-related trauma.

Back/Hip/Rib

DJO – 14A01

A versatile wrap-style cold therapy cuff designed to contour around the back, hip, or rib area.

It helps manage swelling and discomfort following hip surgery, rib injuries, or lower back trauma.
