

HOME CARE HOSPITAL BED BY INVACARE

SKU: INV-5411IVC

Product Overview

The Invacare Full-Electric Homecare Hospital Bed is designed to provide adjustable comfort, safety, and caregiver support in a home setting. Full electric functionality allows users to adjust the head, foot, and bed height using a simple hand-held pendant. Caregivers can easily raise or lower the bed to reduce strain during transfers and daily care. Built with durable, easy-to-clean components and a low-voltage motor system, it delivers dependable long-term performance.

Features

- Full electric head, foot, and height adjustments
- Ergonomic hand pendant with easy-to-press buttons
- 450 lb weight capacity for dependable support
- Low-voltage motor system for quiet, smooth operation
- IP66-rated waterproof motor enclosures for easier cleaning
- High-impact, scratch-resistant bed ends
- Rubber-tread casters to protect the flooring
- Double-insulated junction box for added electrical safety
